Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	10 Marks

Project Overview:

Project Name: Auto Ticket Classification using Flow Designer

Project Description: A school IT helpdesk receives daily incident requests (Wi-Fi issues, projector failures, password problems, slow computers) that IT staff categorize manually. This project automates classification in ServiceNow Flow Designer by analyzing keywords in the short description, assigning Category and Subcategory at ticket creation and emailing the caller.

Project Version:

Testing Period: to

Testing Scope:

- **Features and functionalities tested:** custom table Incident WorkFlow with auto-numbering; Category / Subcategory dependent choices; Flow Designer flow "Auto Classify School IT Tickets" (trigger: record created, Category is empty); keyword-based classification; automated email to the caller.
- **Requirements:** (1) classify IT tickets automatically from the issue description; (2) assign Category and Subcategory without manual intervention; (3) support dependent choice logic; (4) send an automated email to the caller on ticket creation; (5) store ticket information in a structured, standardized format; (6) ensure easy maintenance and scalability.

Testing Environment:

URL/Location: ServiceNow instance (Global application scope; update set "Project Update Set"). Instance URL not stated in the project document.

Credentials (if required):

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Wi-Fi ticket classification (positive)	1. Open a new Incident WorkFlow record. 2. Enter Caller and Short description "WiFi not working in library". 3. Save and reload the form.	Category = Network, Subcategory = Wi-Fi.	INC00511: Category Network, Subcategory Wi-Fi.	Pass
TC-002	Projector ticket classification (positive)	1. Open a new record. 2. Enter Caller and Short description "Projector not turning on". 3. Save and reload.	Category = Hardware, Subcategory = Projector.	INC00512: Category Hardware, Subcategory Projector.	Pass
TC-003	Email notification to caller	1. Create a ticket. 2. Open All menus → Emails (System Logs). 3. Search the subject; use Preview Email.	Email "Your Request for the issue has been submitted." sent to the caller.	Email records found (send-ready, SMTP); preview displayed.	Pass
TC-004	Category-Subcategory dependency (positive)	1. Open a new record. 2. Select each Category. 3. Open the Subcategory list.	Only the matching Subcategory is shown (Network→Wi-Fi, Hardware→Projector, Access→Forgot Password, Performance→Slow Computer).	Each Category showed only its matching Subcategory.	Pass
TC-005	Auto-number generation	1. Create tickets. 2. Check the Number field.	Unique INC number generated automatically.	INC00511 and INC00512 generated.	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-006	Password ticket classification (positive)	1. Enter Short description containing "Forgot password". 2. Save and reload.	Category = Access, Subcategory = Forgot Password.	Branch configured; test not shown in project document.	Not tested
TC-007	Slow computer ticket classification (positive)	1. Enter Short description containing "Slow computer". 2. Save and reload.	Category = Performance, Subcategory = Slow Computer.	Branch configured; test not shown in project document.	Not tested
TC-008	Short description with no matching keyword (negative)	1. Enter a Short description with none of the keywords. 2. Save and reload.	No condition matches; Category and Subcategory are not auto-assigned.	Not shown in project document.	Not tested
TC-009	Mandatory fields left empty (negative)	1. Leave Caller / Short description empty. 2. Submit.	Error shown for mandatory fields (*).	Not shown in project document.	Not tested

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
