

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	2 October 2026
Team ID	6ab8b175c23107aaaa72cd74
Project Name	Auto Ticket Classification Using Flow Designer
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

- 🕒 10 minutes to prepare
- 🕒 1 hour to collaborate
- 👤 2-8 people recommended

➔

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

🕒 10 minutes

A Team gathering
Define who should participate in the session and send an invite. Gather the project team and share the Auto Ticket Classification problem details as pre-work ahead of the session.

B Set the goal
Think about the problem you'll be focusing on solving in the brainstorming session. Goal: find ways to automatically classify school IT tickets (Category & Subcategory) using ServiceNow Flow Designer.

C Learn how to use the facilitation tools
Use the Facilitation Superpowers to run a happy and productive session.

1

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

🕒 5 minutes

PROBLEM

How might we automatically classify school IT helpdesk tickets (Category & Subcategory) at the time of creation, so IT staff spend less time on manual review and tickets are routed faster?

Key rules of brainstorming

To run a smooth and productive session

- 🕒 Stay in topic.
- 🕒 Encourage wild ideas.
- 🕒 Defer judgment.
- 🕒 Listen to others.
- 🕒 Go for volume.
- 🕒 If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

2 Brainstorm

Write down any ideas that come to mind that address your problem statement.

🕒 10 minutes

TIP
You can select a sticky note and hit the pencil [switch to sketch] icon to start drawing!

Person 1	Person 2	Person 3	Person 4
Keyword match on short description	Detect 'Wi-Fi' -> Network	'Password' / 'Login' -> Access	'Slow' / 'Hanging' -> Performance
Auto-assign Category and Subcategory	Map Projector -> Hardware	Self-service reset link in email	Trigger on Record Created
Email caller on ticket creation	Dependent Subcategory choices	Mandatory Caller & Short Description	Run only when Category is empty
Person 5	Person 6	Person 7	Person 8
Auto-assign to support group	Reusable flow with If / Else If	Dashboard of tickets by category	Test with sample tickets
Set priority by issue type	No-code, easy to maintain	Auto-number INC tickets	Check Emails log for notification
SLA tracking (future scope)	Add new keywords easily	Export update set to deploy	Predictive Intelligence (future)

3 Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

🕒 20 minutes

TIP
Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

Network issues are identified from Wi-Fi keywords	Projector problems are routed to Hardware	Password and login issues become Access tickets
Detect 'Wi-Fi' -> Network	Map Projector -> Hardware	'Password' / 'Login' -> Access
Keyword 'Network'	Subcategory: Projector	Subcategory: Forgot Password
Subcategory: Wi-Fi	Projector not turning on	Self-service reset link
Dependent Subcategory choices	Add more hardware keywords	Faster account recovery
Slow computers are classified as Performance	Flow Designer classifies tickets at creation	Caller is notified and solution stays maintainable
'Slow' / 'Hanging' -> Performance	Trigger: Record Created	Send Email to caller
Subcategory: Slow Computer	Condition: Category is empty	Auto-number INC tickets
Detect lag complaints	If / Else If keyword logic	No-code, easy upkeep
Performance category	Update Record action	Export update set

Step-3: Idea Prioritization

4 Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

🕒 20 minutes
